Dear Mr. Healy:

#98-05

Healy Systems Model 715V Upgrade Kit For Healy 8701 Breakaway

You requested California Air Resources Board (CARB) approval of the Healy Model 715V Upgrade Kit for use with the Healy Model 8701 breakaway. The kit may be either factory or field installed inside the Healy 8701 breakaway, converting it to an 8701VV breakaway with vapor valve. The 8701VV breakaway is designed for use with the Healy Model 600 nozzle systems, G-70-165 and G-70-183.

As required by the certification Procedures for Gasoline Vapor Recovery Systems at Service Stations, the approvals of the three State agencies is a precondition to certification by the Air Resources Board. The appropriate letters of approval have been received and are listed as follows:

-Department of Food and Agriculture,
Division of Measurement Standards
August 30, 1995.

-Department of Occupational Safety and Health
February 20, 1998

-Department of Forestry and Fire Protection
Office of the State Fire Marshal
Certification # GVRC 005:027:016, issued February 25, 1998.

James Healy

-2-

March 20, 1998

I find that the use of the Healy Model 715V Upgrade Kit, when installed in accordance with the manufacturer's instructions and the conditions listed above, will not adversely affect the performance of vapor recovery systems on which it is installed. Therefore, the Healy Model 715V Upgrade Kit is certified for use with the Healy Model 8701 breakaway as a factory or field installed kit.

If you have any questions or wish to discuss this matter further, please call Paul Thalken at (916) 445-0383 or Laura McKinney at (916) 327-1525.

Sincerely,
